

Patient Identification Wristbands

Positive patient identification from admission to discharge

Positive patient identification across the entire patient journey continues to pose a major challenge for healthcare organizations around the globe. Wristbands are particularly critical for safe and accurate patient identification; however, many issues affect their performance:

- Illegibility due to small font, or bands that will not scan properly;
- Ink that fades with exposure to water, alcohol or hand sanitizers;
- Bands that are too narrow to accommodate the printed ID label, or that fall off easily;
- Lack of a clear covering to protect the information from degradation, and the list continues.

Any of these issues will introduce errors into the workflow, compromise patient safety and force clinicians to use workarounds with, often, dire consequences.

Zebra's complete suite of patient identification **wristbands** is the right treatment for all those ailments. They help protect the well-being of patients and the integrity of the healthcare system.

PATIENT IDENTIFICATION WRISTBANDS

Welcome to Patient Identification Peace of Mind

Wristbands are a vital component of the patient identification process. At Zebra, all patient identification wristbands undergo severe stress testing to measure resistance to a wide range of substances that can degrade readability, to ensure they withstand the rigors of the busy hospital environment.

With our wide range of direct-print, barcoded, durable laser and thermal printable wristband solutions and special patient condition identification solutions, health organisations can ensure adult, paediatric and infant patients are accurately identified throughout their hospital stay. See the choices below.

Z-Band® Wristband Product Portfolio

Our direct thermal Z-Band wristbands are the most durable, comfortable and easy to use solutions for patients, clinicians and admissions. During our 22 years providing thermal wristbands, we have frequently improved them based on customer feedback and new hand sanitizers in the market.

Z-Band UltraSoft	Z-Band Direct	Z-Band Newborn	Z-Band QuickClip™	Z-Band Fusion
<ul style="list-style-type: none"> • One of the softest direct thermal wristbands in the market • Available in adult, paediatric and infant sizes; white • Adhesive closure • Resistance to hand sanitizers • Maternity ID Solution option (1 adult and 2 infant wristbands) enables the identification and association of a mother and her newborn baby 	<ul style="list-style-type: none"> • Classic wristband • Adhesive closure • Available in adult, paediatric and infant sizes and 7 colours • Resistance to hand sanitizers 	<ul style="list-style-type: none"> • Soft polypropylene material; perfect for delicate skin • Adjustable band fits the smallest patients • Flat print area ensures ease of scanning • Adhesive closure • Available in 2 versions: Standard and Soft (features a soft nylon backing) 	<ul style="list-style-type: none"> • Classic wristband • Clip closure • Available in adult and paediatric sizes • Colour clips available in 6 colours • Resistance to hand sanitizers 	<ul style="list-style-type: none"> • For long-term care facilities • Patented self-laminating design preserves patient data for longer usability • Advanced shape and design makes assembly easy • Flat print area ensures ease of scanning • Adhesive closure

LaserBand® Wristband Product Portfolio

Zebra’s self-laminating LaserBand direct-print laser wristbands enable printing wristbands and labels on one sheet utilizing existing laser printers. LaserBand® Original, was the first direct print self-laminating laser in the market. Over the years, Zebra’s Supplies R&D continued developing new and improved solutions.

LaserBand2® Advanced	LaserBand2®

PATIENT IDENTIFICATION WRISTBANDS

Infant Identification Solutions

Identifying and wristbanding infants is a sensitive issue. While healthcare facilities go to great lengths to properly identify infants, clinicians are also concerned with the comfort and durability of the bands. Zebra also offers a complete line of soft infant wristband accessories for use with Z-Band® and LaserBand® wristbands to ensure comfort.

Comfy Cuff	Comfy Cuff Infant Swaddle Band
 <p>This soft, foam cuff features an adjustable Velcro® closure ensuring infant comfort.</p>	 <p>Tyvek band creates an extension between the ComfyCuff and LaserBand®2 Advanced Infant ID tags or Z-Band® Direct Soft Infant Wristband to make identification of swaddled babies quick and easy.</p>

Zebra is committed to providing healthcare organisations with wristbands that meet our highest standards for image durability, scannability and comfort. They are designed, produced and rigorously tested to ensure optimal performance in clinical workflows, helping reduce medical errors and ensure better patient safety. For industry-leading quality, service and thermal printing expertise, choose Zebra Certified Supplies.
