New in Enterprise Keyboard Designer 1.9.8

Target device lists have been consolidated by device-model series, which comprise identical device skins and screen resolutions.

NOTE: Support for Enterprise Keyboard varies by device and Android version. Please see the [Enterprise Keyboard device support matrix](#) for specific device and OS support information.

Usage Notes

To create custom layouts for EC50/EC55 devices, Zebra recommends selecting “TC5-Series” from the EKD device drop-down list.

To create custom layouts for MC22/MC27 devices, Zebra recommends selecting “MC3-Series” from the EKD device drop-down list.

Resolved Issues – None

Known Issues – None

About Enterprise Keyboard Designer

Enterprise Keyboard Designer is a free desktop tool for Windows that employs a drag-and-drop interface for quickly creating customized device keyboard layouts for use on Zebra Android devices. As many as 20 custom keyboard layouts can be created and deployed to devices to address specific input requirements and extend

Zebra's Enterprise Keyboard, which is required to use the layouts. Layouts are stored in a single, encrypted file for easy, secure deployment.

Enterprise Keyboard Designer (EKD) offers control over all attributes, including layout size, position, background color, transparency, font size, images and many other properties. Available from the Zebra Support Portal, EKD installs quickly from a single download package on desktops and laptops running Windows 7, 8 and 10.
