

Know What's Going On Inside Your Cargo

Reimagine your cargo loading operations with SmartPack™ Container.

Optimize
space to ship less air and reduce operating costs.

Process
more packages faster with greater efficiency.

Reduce
damage and loss.

Receive
real-time insights and data to improve processes and safety.

Take the best route for optimizing your operations with SmartPack™ Container.

- **Capture live images**
on a centralized dashboard view
- **Utilize 3D sensing technology**
to enhance load efficiency and quality
- **Deliver real-time visibility**
into your loading operations
- **Supervise multiple container loads**
simultaneously
- **Assess real-time metrics**
for snapshots, alerts and decision making

The Intelligent New Loading Environment

Sense

what's happening across your loading operations.

Enable deeper enterprise visibility into people, processes, packages and productivity.

Mobile, enterprise-grade sensing and scanning technology.

Analyze

real-time and historical data instantly.

Empower your workforce by delivering actionable insights.

Drive smarter business decisions.

Act

on data to improve loading efficiencies and performance.

Help workers make the right next move, at the right time.

Experience a greater vantage point for a greater advantage.

Here's how logistics organizations benefit from SmartPack™ Container...

The Cost Savers

Watch performance go up as operational costs go down

- **Measure volumetric efficiency** for better space utilization and fullness tracking
- **Manage multiple loads** via fixed or mobile dashboards
- **Collect and analyze real-time data and historical trends** from one or multiple cargo loading areas

The Time Savers

Load containers more quickly and accurately

- **Monitor load rates and quality status** in all containers via visual indicators
- **Customize alert triggers** for load quality, idle time and container open/close status
- **Access real-time views** into fullness, wall-by-wall profile and utilization

The Right Tools

Improve quality, training and safety

- **Monitor load construction** to ensure balance and proper stacking
- **Maximize historical data and images** to develop or improve safety and training
- **Utilize the centralized dashboard** to monitor the loading process and provide real-time feedback to workers when needed
